## Who we are

---

Our professional investigators and analysts have extensive commercial, government, defence and regulatory experience, offering exceptional risk assessment, investigation, prevention, change management and business threat resilience across broad threat spectrum. We provide industry leading services covering digital and cyber threat, physical security, data protection, intellectual property, incident management and bespoke reporting.

## What we do

---

Our unique and professional approach can be the difference between reputational damage and financial loss or operating with a robust and sustainable layered defence that protects and supports an environment for growth and success. Using expert skills and experience, we assist clients to better understand their risk exposure and optimise operations. Working with their constituent teams we create informed networks. We harness organisational knowledge to provide solutions that can be implemented within the control of the client, assuring organisational and business integrity.
